

WonderJobs — Production Readiness Checklist

Verify each item in order and tick it. Stop at the first failure and fix it before moving on.

Production: <https://jobs.wonderapps.biz> · Date verified: _____ · Verified by: _____

1. Release

✓	Check	How to verify / expected result
☐	1. Merge the work into main	Merge branch claude/wonder-jobs-update-26qrf8 into main. CI (npm run check) is green.
☐	2. Production deploy is live	Vercel → Deployments: latest main commit is Ready and marked Production.

2. Environment variables (Vercel → Settings → Environment Variables → Production)

✓	Check	How to verify / expected result
☐	3. Supabase connection	NEXT_PUBLIC_SUPABASE_URL and NEXT_PUBLIC_SUPABASE_PUBLISHABLE_KEY are set.
☐	4. Service role key rotated	SUPABASE_SERVICE_ROLE_KEY holds a newly rotated key (the old one was shared in chat). Marked Sensitive.
☐	5. Encryption key	SECRET_ENCRYPTION_KEY is set (≥ 32 chars). If one already existed, it was kept unchanged.
☐	6. Cron secret	CRON_SECRET is set.
☐	7. Platform admins	JOBSLAKE_ADMIN_EMAILS lists your admin email(s), comma-separated.
☐	8. Platform AI	WONDERJOBS_AI_PROVIDER + WONDERJOBS_AI_KEY are set (WONDERJOBS_AI_MODEL optional).
☐	9. Push notifications	VAPID_PUBLIC_KEY, VAPID_PRIVATE_KEY and VAPID_SUBJECT are set.
☐	10. Contact form email	RESEND_API_KEY, CONTACT_NOTIFY_EMAILS and CONTACT_FROM_EMAIL are set.
☐	11. Site URL	NEXT_PUBLIC_SITE_URL = https://jobs.wonderapps.biz
☐	12. Optional sources	ADZUNA_APP_ID + ADZUNA_APP_KEY set if you want Adzuna India (otherwise it shows “Needs setup”).
☐	13. Not set in production	JOBSLAKE_LOCAL_ADMIN is absent.
☐	14. Redeployed	Redeploy after any variable change. Variables only apply to new deployments.

3. Database (Supabase project tybklggpifpsmsidhok)

✓	Check	How to verify / expected result
☐	15. Migrations 0001–0006	Supabase → Database → Migrations shows all six applied.
☐	16. Migration 0007_jobslake	Applied. /platform/jobs-lake → Settings no longer says history is kept in memory.
☐	17. Security advisors	Supabase → Advisors: no new critical items.

4. Accounts

✓	Check	How to verify / expected result
☐	18. Sign up	A new test account receives the confirmation email and lands in onboarding.

✓	Check	How to verify / expected result
☐	19. Sign in / sign out / reset	All three work. Reset email arrives.
☐	20. Data syncs	Sign in on a second browser: same Career Profile and applications.
☐	21. Isolation	A second test account cannot see the first account's data.

5. Core features

✓	Check	How to verify / expected result
☐	22. Career Profile	Add work history and contact details. They are still there after a reload.
☐	23. Find jobs	Run a search: real postings, per-source counts shown, no sample data.
☐	24. Job detail	"Where this job was found" lists the sources.
☐	25. Application Pack	Generate résumé, cover letter and answers. Each is labelled AI-generated.
☐	26. Platform AI	Settings → AI says "written by <model> on the platform's own key", not "template drafts".
☐	27. BYOK	Save a provider key. It shows masked and works.
☐	28. Résumé templates	Résumé Studio shows 8 templates with your data. PDF and DOCX download.
☐	29. Applications	Mark one submitted: timeline updates and a follow-up is set.
☐	30. What Wonder can do	Lists "Fill application forms", set to Ask by default.
☐	31. Scheduled search	Create a schedule. Vercel → Cron Jobs: /api/cron/scheduled-runs returns 200 at 02:00 UTC.
☐	32. Push notification	Enable notifications. A test notification arrives.
☐	33. Calendar feed	The calendar feed link opens as an .ics file.
☐	34. Contact form	Submit it. The notification email arrives.

6. Apply with Wonder

✓	Check	How to verify / expected result
☐	35. Entry point	A job with a prepared résumé shows "Apply with Wonder". A job without one shows it disabled, with the reason.
☐	36. Preflight	Shows the checklist, application destination and résumé choice.
☐	37. Guide me	Copy buttons, résumé download and pack zip work. "Yes, application submitted" adds it to Applications.
☐	38. Browser helper installed	Install from /extension (helper v0.2.0). The popup shows "Connected".
☐	39. Helper fills a real form	Start on a real Greenhouse or Lever posting: form is read, "Fill N fields" fills your details. Don't submit unless you intend to apply.
☐	40. Sensitive fields	Work authorization, sponsorship and demographic questions are never filled.
☐	41. Stop	Stop (helper or WonderJobs) halts filling. Nothing is submitted.
☐	42. Dashboard	/app/applications/apply lists the session with its status.
☐	43. Duplicate warning	Opening Apply for an already-submitted job shows the warning.

7. Admin portals

✓	Check	How to verify / expected result
☐	44. JobsLake	/platform/jobs-lake loads for an admin. A non-admin account gets 404.
☐	45. Sources healthy	Sources are Active. The Health page has no red alerts.
☐	46. JobsApply	/platform/jobs-apply loads and shows counts only.

8. Security spot checks

✓	Check	How to verify / expected result
☐	47. Signed-out access	/app redirects to sign-in. /api/jobs-apply/sessions returns 401.
☐	48. Cron protected	Calling /api/cron/scheduled-runs without the secret is refused.
☐	49. Clean up	Delete the disposable test accounts.
